

SPDGBASE Litepaper v1.1

Base Network

1. Executive Summary

SPDGBASE is the structured expansion layer of the SpaceDoge (SPDG) ecosystem, built on Base Network to enable disciplined liquidity formation, transparent capital deployment, and scalable DeFi infrastructure.

- Locked reserve policy
- Contract-controlled allocations
- Structured liquidity deployment
- Phased capital formation
- Objective: Controlled expansion, not short-term volatility

2. Token Structure

Total Supply: 100,000,000,000 SPDGBASE

- 60B — Reserve (Locked until August 21, 2027)
- 20B — Structured Presale Allocation
- 5B — DEX & Exchange Liquidity Allocation
- 15B — Operations & Ecosystem Expansion
- All allocations publicly verifiable on BaseScan

3. Capital Formation Model

Soft Cap: $300,000

Hard Cap: $1,500,000

Target Public Listing Price: $0.001

Soft Cap Deployment:

- 70–90% deployed to DEX liquidity
- Liquidity paired using tokens from 5B allocation
- LP tokens locked
- Public trading initiated at $0.001

4. Liquidity Philosophy

- Controlled circulating supply
- Deep initial liquidity
- Strict vesting enforcement
- No artificial volume
- No unmanaged emissions

5. Roadmap

- Phase 1 — Structural Foundation (Reserve locked, contracts verified)
- Phase 2 — Liquidity Deployment (Capital formation & DEX launch)
- Phase 3 — DeFi Integration (Staking & governance layer)
- Phase 4 — Ecosystem Scaling (Exchange positioning & partnerships)

Closing Statement

SPDGBASE represents disciplined capital formation on Base. Structure before scale. Scale before dominance.
